IndieCollect's mission is to **rescue, restore, and re-activate** American independent cinema. We believe indie film is the lifeblood of an open society. We focus on survival of movies that matter, bringing them to new audiences and working with our archive partners and allies to secure their safe, long-term, physical and digital storage.

In 2017, we launched our **Queer Cinema Index**,
a joint project with Outfest and the UCLA Film & Television Archive.

Special thanks to **Hollywood Foreign Press Association Trust**
for its grant to restore Jan Oxenberg's *A Comedy In Six Unnatural Acts*,
a landmark in the history of New Queer Cinema.
Your contribution will help underwrite this restoration.

Thank you for supporting our campaign to #SaveIndieFilm
